

GSA Curriculum Map 2021-22: ICT, Business and Computing

We aim to develop all students into economists who:

- have opportunities to indulge their natural curiosity for economics leading to a lifelong passion
- are economically confident and have understanding of a range of economic concepts, models and theories and appreciate that economic behaviour can be studied from a range of perspectives.
- have an enquiring, critical and thoughtful approach to the study of economics and develop an ability to think like an economist, developing both analytical and quantitative skills.

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 12						
Subject	Economics					
Topics	<p>Micro: Price determination in a competitive market and production costs and revenues. Macro: The measure of macroeconomic performance</p>	<p>Micro: Economic methodology and the economic problem Macro: How the macro economy works</p>	<p>Micro: Competitive and concentrated markets Macro: Economic performance</p>	<p>Micro: The market mechanism, market failure and government intervention Macro: Economic performance and macroeconomic policy</p>	<p>Micro: The market mechanism market failure and government intervention Macro: Macroeconomic policy</p>	<p>Micro: Individual economic decision making Macro: The measurement of macroeconomic performance</p>
Skills	Quantitative skills including: constructing and interpreting graphs, calculating and interpreting index numbers, elasticities, profit, costs and revenues.		Quantitative skills including: constructing and interpreting graphs, and providing logical chains of analysis and evaluation.		Quantitative skills including: constructing and interpreting graphs and calculating income in real terms.
