“Geography is the subject which holds the key to our future”

Michael Palin; TV presenter, Comedian and Geographer

We will begin by looking at...

Important human and physical geography features of the world.

Geography is such a huge subject that Geographers split the world around us into physical (natural) features and human (man-made) features.

Our Diverse World

Can you find the definition of these keywords?

- Equator
- Tropics
- Economy
- Trade
- Biome
- Population

Our planet has many amazing places, both natural and man made features.

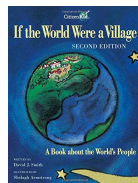

Can you choose a city or a biome that you would like to know more about and complete some research on it?
